

BPS Symposium at EPHAR 2012 Biological and Therapeutic Roles of Glycine Receptors

Granada, Spain

Wednesday, July 18th 2012

From 9:00 to 10:30 am

Room: To be confirmed

-
- | | |
|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 9:00-9:05 | Introduction
Professor Robert J. Harvey, UCL School of Pharmacy, London, UK |
| 9:05-9:20 | Pathomechanisms of glycine receptor channelopathies and regeneration of synaptic plasticity
Professor Dr Carmen Villmann, Institut für Klinische Neurobiologie, Universität Würzburg, Germany |
| 9:25-9:40 | A novel role for the glycine receptor $\alpha 4$ subunit in spinal and hindbrain control of startle and motility
Dr Maximiliano Suster, Sars International Centre, Bergen, Norway |
| 9:45-10:00 | Probing glycine receptor activation
Professor Trevor G. Smart, University College London, UK |
| 10:05-10:20 | Molecular genetic studies of glycine receptor $\alpha 2$ and $\alpha 3$ subtypes
Professor Robert J. Harvey |
