## Become a member today

### The Clinical Committee

The Clinical Committee has an influential role in the British Pharmacological Society by representing:

- Clinical pharmacologists in the health service, academia and industry
- Other organ-based clinical specialists who are interested in, and/or undertake research in clinical pharmacology and translational medicine
- Doctors training in Clinical Pharmacology & Therapeutics (CPT)
- Medical students & junior doctors with an interest in pursuing a career in CPT
- Other prescribing professions, including pharmacists and nurses
- Academic pharmacologists with an interest in clinical pharmacology

The Clinical Committee champions the value of clinical pharmacology with audiences in academia, healthcare and government as well as the public – and looks forward to involving new members in its activities.

### Additional membership benefits

Alongside generous core member benefits, the British Pharmacological Society also offers its clinical members:

- Free access to the *British Journal of Clinical Pharmacology* – online and through the journal's iPhone/iPad app
- Funding to run regional meetings
- Eligibility for clinical pharmacology prizes offered by the Society
- Access to CPD-approved meetings and workshops
- A dedicated free monthly e-newsletter
- Opportunities to join the Clinical Committee to contribute to the work of Society to advance the discipline of clinical pharmacology
- Opportunities to contribute to medical education initiatives including *Prescribe* and the Prescribing Safety Assessment
- Access to free resources including careers leaflets for use in your medical school

### Get in touch

Contact the British Pharmacological Society today to find out more about the benefits and services available to members and start your application. The Society has reduced membership rates for students, as well as tailored support and benefits for women in clinical pharmacology.
